Office Action Summary

Art Unit: 1712

DETAILED ACTION

1. The final rejection of 3/12/03, paper no. 8 is hereby withdrawn and superseded by this present action. Applicants after final amendment has been entered.

Claim Objections

2. Claim 21 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 21 fails to further limit parent claims 19 and 20..

3. Claims 42, 43, 48 are objected to because of the following informalities: In claims 42, line 4 and claim 43, line 5, after "injection", the period should be removed. In claim 48, it is believed that the term "., said breaking system" in line 5 should be deleted, in order to clarify the claim.. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 5, 6, 8, 11, 16-18, 24, 25, 26, 38, 41, 44, 49 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vollmer (6432885 B1).

Vollmer teaches a fluid which is used in fracturing a formation which comprises an amphoteric viscoelastic surfactant and an acid forming compound (column 5, lines 6-33). The acid forming compound may be esters such as acetates, formates etc., which would form acids, and alcohols such as methanol and ethanol, upon hydrolysis of the ester in the fluid (column 3, line 61 - column 4, line 6). Vollmer differs from the present invention in that a specific example of using the acid forming compound is not disclosed. However, Vollmer teaches that the formulation comprising the acid-forming compound is particularly preferred (column 5, lines 6-15). It would thus be obvious to one of ordinary skill in the art to make the fracturing fluids of Vollmer, containing the acid forming compounds, such as esters, given the teaching of Vollmer that such fluids are particularly preferred for the use in fracturing operations.

6. Claims 19, 20, 22, 23, 29, 33-35 and 37 are allowable over the art of record.
7. Claim 3, 4, 7, 9, 10, 12-15, 21, 42, 43, 45 and 48 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 46 and 47 are dependent upon objected claim 42.
8. Applicants amendment has overcome the rejection over Chang. A new rejection is presented in this action.
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip Tucker whose telephone number is (703) 308-0529.
